POLARIS

Permanent progressive epilazione

Amazing results unimaginable with technologies so far known.

- Spot head: up to 10,000,000
- Spot size: 16 x 16 mm (2.56 cm²)
- Laser Diode: 808 nm
- Painless treatment
- Large touch screen display 10 "
- Revolutionary software easy work
- Computerized medical history

THE PLUSES:

- Profitability: the reduced time taken for each individual treatment.
- Profit: the high profitability of treatment enables high gains for the Institute. This thanks to the possibility to integrate multiple hair removal treatments on different parts of the body is even in the same session.
- Execution speed: saving time for Customer's that have less and less time available.
- Functionality and efficiency: visible results ASAP. Only 5-7 seats for a full treatment.
- Security: software usage and function control + quality materials + protocols tested to work for 12 months a year is also on tanned skin.
- Comfortable: painless treatment. Intensive cooling with double circuit.
- TARGETED: excellent results even on difficult areas such as elbows ' knees ' Chin ' mustache ...
- Avant-garde and DESIGN: nothing is left to chance ' design and ergonomics are the «skin» which contains high level technology.
