HAIR DRYER VOLARETM

cod. BABV2RE

designed in collaboration with Ferrari

The V12 engine, designed in collaboration with Ferrari, has been produced exclusively for the VOLARETM hair dryer Babyliss Pro®.

Capable of exceptional performance, hairdryers VOLARETM V1 and V2 generate a higher air pressure (6.2 bar V1 / V2 6.4 bar), are equipped with a turbo button that instantly produces a flow of air for intense drying; drying at great speed, and two vents concentric ultra-thin (6.5 mm), of different shapes (a straight, the other slightly rounded) that allow to direct the air with precision on the hair.

VOLARETM is also equipped with ion generator Tri-Port, able to generate millions of negative ions per cm³ of a real blast of cold air as well as 12 speed settings and temperature.

Specifications:

- 2 ultra thin nozzles.
- Turbo Accelerator for instant drying.
- Ion Generator Tri-Port.
- Ergonomic design and completely balanced.
- 12 levels of speed and temperature.
- Cable : 2.8 m antinodes.
- Design Engine Ferrari.
- V12 AC 2200 W.
- High performance. Turbo function. Long life, up to 2000 hours.
- Air speed : 130km / h.
- Air volume : 95 m³ / h.
- Optimal air pressure (V1 6.2 bar/V2 6.4 bar).
- Adjusted and balanced individually factory.
