BOUCLE BIOWAVING SYSTEM

waving system

We made a gentle waving system for natural hair, big, chemically treated and thin. Formulated with cysteamine, an active ingredient derived from natural amino acid, similar to the molecular structure of the hair, creates a ripple smooth and natural, renovating and maintaining the integrity of the hair with conditioning agents. This results in soft curls that maintain elasticity and volume. This particular formulation also eliminates the risk of an excessive response to the stimulus.
