OIL MINERALIZING

for damaged hair and complement the technical services

Restructuring for hair that is composed of mineralizing salts, wax of the anionic type and a base emulsifier of the cationic type. Applied to damp hair, instantly produces a restructuring action on the damaged parts of the hair. It is recommended for use before and especially after the permanent dyeing and bleaching. The high emollient facilitates blow-drying and combing, however, making the hair shiny and soft. Excellent as dandruff.

method of use : before and after any treatment, pass the entire contents of the ampoule evenly over the hair. After a few minutes of laying rinse thoroughly with warm water.

box: 12 ml vial in carton of 10 pcs
