MIRACURL MIRACURL

BaByliss PRO proves once again that innovation is an integral part of its DNA. The brand goes further, in high technology. Because even the most experienced professionals need time to create sophisticated hairstyles, BaByliss PRO invented MIRACURL the Perfect Curling Machine.

Available three levels of temperature regulation and three levels of adjustment of the heating time of the lock, in order to realize various combinations, depending on the nature of the hair, the intensity of curls desired and the desired results. All this while preserving the integrity and health of the hair.

You can also control the direction given to the curl, both to obtain a final result uniform on the whole of the hair with curls oriented toward the face or to the outside of the face, both to obtain a more natural result due to its mode auto which allows you to switch the direction given after each strand to curl.

Its effectiveness helps reduce the use time and allows you to create an infinite variety of styles in record time.

Extremely easy to use :

- a strand of hair into the place which automatically wrap and gently warms the inside of the room and ceramic curling (which must always be directed towards the hair) ;
- Keep the appliance closed for a few seconds listening to the beeps until you hear 4 quick beeps ;
- Release and admire the magnificent curl perfectly defined.
