They use an innovative technology that penetrates the hair cuticle and cortex, raising the moisture levels to leave hair soft and shiny and stimulate growth.

- Ceramic plates furniture.
- Cylinder rounded.
- Action -ionizing.
- Digital control of temperature change.
- Heats up to 450 degrees Fahrenheit.
- The automatic control reduces the iron temperature to 350 degrees Fahrenheit when the iron is deposited why not in use. When the temperature is taken quickly goes back to the initial setting. This feature increases the longevity of the iron and keeps the handle cool.
- Dual voltage: 110 V - 240 V (you may need to buy an adapter for use outside the United States).
- The Intelligent Celsius / Fahrenheit Conversion automatically switches between Celsius and Fahrenheit mode depending on the voltage of the current.
