ROLLING UPGRADE professional rotating curling iron

new iron ROLLING UPGRADE Upgrade the line marks a change in the perception of the work, due to its special features.
The originality of the ROLLING UPGRADE iron is that it can rotate at 360 degrees the heating rod made of titanium to create beautiful curls and ringlets in no time. The use of the ROLLING is very simple: it is sufficient to lock a lock of hair in the clamp placed over the bar and rotate this with your index fingers and thumb, rolling the strand around the bar. Do not stop with the rotating motion until the hair will not be detached themselves from the bar, this is the signal that the bushing is ready and you can remove the iron.

The long titanium bar allows to have a constant and uniform temperature over the entire surface, allowing the remarkable results. On the tip of the iron UPGRADE ROLLING is placed a strip of Teflon red color, this serves to indicate the variation of the temperature of the iron, to become white in color, indicating that the device has reached the set temperature and therefore is ready for use. This particular may also be useful to realize, once switched the iron UPGRADE ROLLING for how long it will still hot, as the color of the strip will gradually return to the red color, and then to the cooling of iron
