HIGH PREMIUM STRUCTA ALTA STRUCTA PREMIUM

research laboratories Revivre born STRUCTA HIGH PREMIUM dermatologically tested and sles free : four programs to restructure, nourish, restore and give volume to the hair strength, vitality and shine. Revivre has identified, as part of their research, several proteins with particular affinity for the hair. Mixing them properly and associating them with other natural active ingredients, was born on PPC ® (Protective Protein Complex ®): a system for the protection of the hair a new concept, that exploits the full potential of proteins associated with a selected extract of Lycopersicum. The PPC ® exploits the ability of the protein to bind to the hair and to foster links between the keratin fibers. In addition, specific proteins of wheat germ, rice, milk and silk, carry out their activities reparative fixating on the hair and creating a protective film and moisturizing.

STRUCTA HIGH PREMIUM: RESTRUCTURING PROGRAM - Hair unstructured

The unstructured hair is hair which, by their nature or by the numerous chemical treatment, they need immediate and effective treatments.
