TRICOSHOT TRICOSHOT

line curative essential oils
Essential oils are aromatic blends complex, consisting of volatile organic substances contained in certain tissues of many plants. The properties of essential oils are scientifically attributed mainly antiseptic, antibacterial, antiviral and anti-infective, but depending on the plant from which they are extracted, there is also an action balsamic, expectorant, relaxing, stimulating, nourishing, smoothing, and more. The line boasts TRICOSHOT, despite the high quality, great ease of use, the possibility of countless synergies of the products and the involvement of the senses, this makes the product suitable for your individual needs.
