A OZONE STEAMER EKOVIP VAPORIZZATORE EKOVIP A OZONO

The use of ozone vaporizer for the realization of the best technical treatments is now a necessity felt by all hairdressers and when a device combines an efficient technique, ease of use and a line of modern design, you reach perfection. EKOVIP has a full stainless steel boiler with a high efficiency and resistance in less than 4 minutes start to produce steam. One tank filling large capacity allows you to use the unit for a long series of applications without interruption and a sound and light alerts you when the water is finished. The transparent hood is adjustable in inclination of large diameter for maximum user convenience.

Its design is soft and simple with no external kettles that will fall apart with limestone reservoirs of water recovery in sight. Its wide recovery tank is in the body of the device and an exhaust valve allows to empty with comfort in case of forgetfulness, a recirculation system reinserts the water in the boiler. EKOVIP is available in Standard, Ozone and Ozone Digital electronic control. Ability to arm for wall mounting.
