BLEACHING POWDER POLVERE DECOLORANTE

BLEACHING POWDER WHITE - regular formula

It is a mixture of powdered ingredients designed to obtain a discoloration natural and uniform, able to meet the modern requirements of practicality and, at the same time, formulated so as to make the product the less aggressive for hair. Exerts an intense bleaching action without irritating the scalp ; acts quickly and allows to reach a lightening from 4 to 6 tones, depending on the oxidizing capacity of the emulsion Black (20/30/40 volumes). Suitable for young hair, with streaks gives the best results and long-lasting, leaving hair soft and shiny, thanks to the protective action of the skin cellulosic derivative, present in the mixture.

BLEACHING POWDER BLUE - formula powder

Has the same performance of Bleaching Powders Bianca and the same mode of use, but has, in addition, the presence of a compound binder, which allows to prevent dust from lifting during the preparation of the cream.
