INOILINSTANT - acidifying compensator

Innovative treatment acidifying sprays, dedicated at the time of hair coloring to immediately re-establish the natural pH, neutralizing the alkalinity due to the color service. The acidic pH, so plywood, blocks the oxidative factors and facilitates the complete closure of the cuticular scales, strengthening the natural protective barrier of the hair. All this, as well as aiding combing and brightness to the hair, helps to reduce the discharge of color pigments while maintaining the uniformity of the color over time. The colored hair, also, will be defended throughout their length by environmental agents with a lasting result of extraordinary brilliance and softness.

box: 300 ml bottle
